Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-11, drawn to a toothbrush, classified in class 15, subclass 167.1.
 - II. Claims 12-16, drawn to a method of manufacturing (by molding) the body of a toothbrush, classified in class 264, subclass 250.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed need not be made by the specific molding steps required by claim 12 (in fact, claims 1 and 11 do not mention any molding). Also, the process as claimed can be used to make another and materially different product such as one without the specific bristle arrangement of claim 11. Also, the process of claim 12 could be used to make a brush blank that did not have an angularly connected neck (the positively recited method steps fail to breathe life and meaning to the preamble. In addition, the method steps are for forming a brush blank and not a completed brush.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
